GENUGTEN AGRI BV

Genugten farrowing crate

Simplicity, functionality and durability in one!

- Functional.
- Convenient.
- 6 width adjustments.
- Optimal price / quality ratio.
- Completely adjustable in length.
- Overhanging.
- Approved quality.

Genugten Agri has developed its own design of farrowing crates. The objectives of developing such crates were simplicity, durability, userfriendliness, a good quality and yet a competitive price!

The result is a galvanised crate which is completely overhanging, with a solid-rod-finger side rail, a protective rail and a stainless steel trough. The crate can be adjusted in length and width and has been tested and improved over a long period!
